Experience

Full Stack Developer - Project Work December 2023 - February 2024

We ended the Progmatic's Full Stack Developer course with a project work. We had to come up with, develop and design a website. Our choice was Recipe King, a recipe uploading site where you can upload your own recipes or search among already uploaded recipes by filtering.

You can find this project on my GitHub.

Career break January 2023 -

In 2023, I started learning coding at home. My goal was to gain enough knowledge to be able to change career. In April, I participated in a full-stack developer course at Progmatic Academy, which lasted until February 2024. I gained skills in React.js, Node.js, Git, SQL. After the course, I gained skills in Angular and PHP from Udemy.

Service technician April 2019 - December 2022

I worked as a fire alarm system maintainer for several companies, such as Schrack Seconet or ASM Security.

Electronic technician July 2016 - March 2019

I worked at MÁV-START Zrt, my task was to install electronic devices in trains, such as monitors, cameras, fire alarm systems.
